Hi Everyone,

I was lucky enough to be at the American Federation of Astrologers conference earlier this month in Arizona, and was delighted to attend Ben Dykes' excellent talk, 'Primary Directions Without Tears'. The source book for his talk was our very own *Primary Directions: Astrology's Old Master Technique* by Martin Gansten. In the Introduction, Martin says:

Students of traditional astrology have often been deterred by overly mathematical presentations from approaching the important subject of directions. This comprehensive study explains the principles of primary directions in an accessible form, illustrating them by practical examples. It also draws on many original source texts to outline the historical origins and development of the technique, and shows how it has been reinterpreted and occasionally misunderstood. A full glossary and appendices with software reviews as well as formulae for manual calculations complement the text.

The craft of the Old Masters can still be learnt.

So there you have it. Not hard after all! You can buy Martin's book from our website for £13.50 plus postage. Enjoy!

The Tenth Planet: Revelations from the Astrological Eris

Henry Seltzer

This book has been several years in the writing - something which becomes immediately obvious once you start reading it. Henry Seltzer has left very few stones unturned in his quest to understand how the archetypal Eris shows itself in a wide variety of charts. From writers to revolutionaries and musicians to poets, the non-negotiable and sometimes violent energy of this new discovery bursts through to enrich and enliven any chart delineation. This treasure trove includes lots of case histories as well as chapters on Eris through the houses and in aspect with other planets. A historical Appendix is also included. £16.50 plus postage.
